Tonight 8:00 PM, Room 101

This page is promo/personal info and must be dropped.

Chapter 1: Gradient Descent

Loss = mean((y - y_hat)^2)

w := w - eta * dLoss/dw

Learning rate too large: divergence

Learning rate too small: slow convergence

Chapter 2: Self-Attention

$Q = X W_Q, K = X W_K, V = X W_V$

$score = Q K^T / \sqrt{d_k}$

$Attention = softmax(score) V$

Multi-head: $concat(heads) W_O$
